MERCEDES-BENZ SPRINTER RWD LWB HIGH ROOF or 4x4 **OPT**

Safety, Strength and Durability Advantages.

*Structural support integrity – high tensile alloy frame around slide-out cut-out

*Swivel TV Bracket pull tested to over 120kg. (The TV safely stays in position whilst travelling)

*Revolution's High Tensile automatic Cabinet door & Drawer Locks, prevent the contents becoming missiles whilst travelling

*Gas Safety Hose - the flow of gas will automatically be stopped at the gas bottle in the event of an accident. Gas bottles are mounted in the Slide-out which eliminates flexible gas lines .

*All Cabinetwork is structurally bonded and screwed to the body, thus reduces noise and provides durability and greater strength in an accident.

*Superior slide-out assembly strength - Serviceable slide-out that extends out approx.. 50% more than other manufacturers,

*Unique pressurised seal remains in contact with the slide-out's external surface at all times prevents dust, water & debris egress. Revolution Motorhomes' design eliminates the need for the traditional external flange which is responsible for pushing debris trapped on the slide-out's roof through the seals, which result in most of the water leak problems.

Body & Structural

Motorhome Dimensions Height with standard A/C unit – 2820mm **STD**

Motorhome Dimensions - 2070mm W x 2590mm H x 6836mm L (without a/c) **STD**
