

**Custom-built for your lifestyle**

*Revolution's aptly named Desire Series combines the best of all worlds, on road they are remarkably compact and easy to drive, yet in living mode are supremely spacious with unparalleled functionality with luxury standard features all at an amazingly affordable price that cannot be matched by any other Manufacturer. More importantly in "travelling mode" the Desire's entire range maintains full access to the kitchen, lounge, wardrobe, and rear bathroom.*

*On road the Revolution's Desire Range's modern slim-line aerodynamic contoured body and awning that does not protrude out past the body is narrower than other luxury car-licensed motorhomes. In combination with the standard 3D 360° "Birds Eye View Camera system" our Desire Range are infinitely easier to drive, much safer to negotiate tight country roads or heavy city traffic and make parking in confined areas like caravan parks a breeze.*

### **Our Desire Series**

*Car Licence –*

*Luxe Range 20-22ft – with or without full-length slide-out. Includes our popular Luxe22 SL – built on a MWB chassis and is only 40mm wider each side of the front cab. Option for true off-grid living - 4x4 with 800w solar and 400amp Lithium batteries, generator, diesel heating and longer range fuel tank.*

*Desire Range 22-25ft – with or without a full-length slide-out – available in 2 sizes - 2.21metres wide with internal height of 1.95 (6'5") & 2.41metres (widest point) with internal height of 2.03metres (6'8").*

*Light Rigid Licence - Desire 26SL, Indulgence Range 26-30ft, motorhomes with a 'toy-garage' and our 30ft Sanctuary motorhome complete with Automated windows and blind system with option of 2 lounges.*

*The Desire SL & Desire Indulgence Ranges' much stronger, longer and wider full length driver's side slide-out which includes our rear bathroom, transforms the interior living space to become an unparalleled 3.1 meters + wide with standard features like the largest kitchens, genuine queen sized beds, expansive full depth hanging wardrobes & storage space, and the largest rear bathroom on the market that features a large separate shower cubicle, market-leading storage plus full length mirrors. Our Desire SL & Indulgence Range truly stands out from the crowd in functionality and price.*

*The variety of sleeping arrangements include full size Twin singles, genuine Island double or Queen bed and in the Desire 26SL & Indulgence range the option of a genuine island king size bed. Our 30ft range has sliding doors to separate the living/entertaining area from the bedroom with cinema chairs, 4 seat/4berth, or 2 lounge option.*

*We also offer a car licence 4 seat/4 berth option on the Desire 24SL, and Indulgence LR 26-30ft range.*

*We can design and custom-build you a motorhome with a rear garage for; motor bikes, 2-seat golf cart, karts and quad bikes – with or without a workshop, complete with automated platforms and ramps. Please email us at [info@revolutionmotorhomes.com.au](mailto:info@revolutionmotorhomes.com.au) for more details.*

*If you take the time to compare our Luxury Desire Series to our competitors' similar sized motorhomes you quickly realise Revolution's designs, technology, structural strength, quality, luxury, vehicle safety and value for money are truly unrivalled.*

*To ensure Revolution exceeds even the most discerning customer's expectations, Revolution has optimised every part of its new ground-breaking Desire Series.*

*For example, while other manufacturers simply graft a square box to the back of driver's cabin which dangerously leaves the awning protruding out past the side of the vehicle by approx. 120mm the driver cannot see the awning in their mirrors. This leads to the awning commonly being damaged or completely smashed off the motorhome by being hit against corners of buildings, over hanging branches or when parking in streets where the gutters are lower than the road way as the motorhome is being parked even near power poles and street signs. Because our Desire range side walls are slightly tapered, our awnings do not protrude out past the side of the motorhome's body*

Revolution's slimmer slightly tapered body shape not only gives our motorhomes a much smoother more aerodynamic fully integrated appearance much easier to drive, triangulating the body shape significantly increases the strength and rigidity of the entire motorhome including our vitally important roll-over frame, with internal and external structural frames with full length coverings that protect the edges and provides superior water-proofing.

We work closely with our clients to ensure their custom-built motorhome exceed their expectations. Luxe Range, Desire 22 and Desire 22 SL have a variety of floorplans (not shown) – please contact for more information.

Revolution's Desire and Indulgence Cab Chassis Series are available on either the new 8-speed VW Crafter, new Iveco Daily, the Mercedes Benz Sprinter or Mercedes Sprinter 4 x4.
